VIVEK VIJAI

Backend Developer & Product Owner | Python · Django · Azure
AZ-900 | Figma · Stripe · CI/CD | Open to roles across Sweden
Greater Stockholm Metropolitan Area

Summary

I'm a Backend Developer based in Stockholm, Sweden — open to opportunities across the country.

At Peckiless AB, I work as both the sole backend developer and product owner for a live Swedish food-tech platform. What that actually means day to day:

- Collaborated on designing the full user journey in Figma (20+ screens across desktop, tablet, and mobile)
- Designed and proposed the checkout flow: Cart → Date & Slot Selection → Payment
- Led payment integration strategy, selecting Stripe to streamline architecture and reduce maintenance overhead; aligned payment options with unit economics and growth stage.
- Built the entire backend from scratch: Django REST APIs, PostgreSQL schema, JWT auth, Redis caching, and Azure deployment via Docker and GitHub Actions CI/CD
- Implemented a 2-day advance booking rule based on operational requirements defined with the manager
- Designed a unified booking flow covering both catering ,event and regular orders, reducing user journey complexity and eliminating redundant steps

Before tech, I spent 5 years in pharma sales and marketing in India. That background gives me something most developers don't have — I understand business context, think about margins and user behaviour, and communicate clearly with non-technical stakeholders.

What I'm looking for: A backend developer role at a Swedish startup or mid-sized company where I can take real ownership — and eventually grow into a Technical PM or product-facing role as the company grows.

Open to any location in Sweden. Feel free to reach out:

Stack: Python · Django · DRF · PostgreSQL · Redis · Stripe · Docker
· Azure · GitHub Actions · pytest · Linux · Figma · JWT · CORS ·
Gunicorn

Experience

PeckiiLess AB

7 months

Back-end Developer

November 2025 - Present (7 months)

Stockholm County, Sweden

Backend Developer & Product Contributor

Swedish food-tech startup building a platform for daily food ordering, catering, and event services.

Product Contributions

Designed end-to-end user journeys in Figma (20+ screens) across desktop, tablet, and mobile; presented and iterated with stakeholders

Defined and implemented checkout flow (Cart → Date & Slot Selection → Payment), incorporating operational constraints such as advance booking rules

Led payment integration decision: selected Stripe to unify card and Swish payments, reducing system complexity and long-term maintenance; evaluated Klarna and deferred based on margin impact and growth stage

Co-designed a unified booking experience for catering and event orders, simplifying the overall user journey

Engineering Ownership

Sole backend developer: architected and built a Django REST API from scratch (PostgreSQL schema design, domain logic, JWT authentication, CORS for React/Vite frontend)

Implemented Stripe payments with idempotency handling to ensure transaction reliability

Containerized services with Docker; deployed to Azure App Service via GitHub Actions CI/CD

Managed production runtime with Gunicorn and monitored application health using Azure Monitor

Developing automated test suite with pytest (targeting 75%+ coverage, including mocked external dependencies)

Contributed to Agile/Scrum processes (sprint planning, standups, retrospectives)

Python · Django · DRF · PostgreSQL · Redis · Stripe · Docker · Azure App Service · GitHub Actions · pytest · Linux · Figma · JWT · CORS · Gunicorn

Full Stack Engineer

November 2025 - Present (7 months)

Sole backend developer — independently researched, architected, and delivered the entire backend for a production web application from scratch, including all business logic, PostgreSQL database design, and third-party integrations. Designed the complete responsive website (desktop, tablet, and mobile) in Figma. Containerized with Docker; orchestrated GitHub Actions CI/CD to Azure and managed Gunicorn on Linux (systemctl). Collaborated in an Agile/Scrum workflow: sprint planning, daily standups, and retrospectives.

Luminar Technolab

Full-Stack Developer Intern (Python & Django)

August 2024 - March 2025 (8 months)

Kerala, India

Built full-stack web applications using Python, Django, HTML, CSS, and JavaScript across 3+ projects during the internship period.

- Developed RESTful APIs with Django REST Framework, implementing CRUD operations, JWT authentication, and user session management
- Worked across the full stack — backend logic, database queries, and frontend integration
- Used Git/GitHub for version control and followed structured software development lifecycle practices

Luminar Techno Lab

Full Stack Engineer

August 2024 - March 2025 (8 months)

Built full-stack Django applications with REST APIs, CRUD operations, and JWT authentication using Python, HTML/CSS, and JavaScript.

Intas Pharmaceuticals

Area Sales Executive

April 2021 - August 2024 (3 years 5 months)

Kerala, India

Area Sales Executive managing pharmaceutical product sales and territory development across Kerala, India.

- Built and maintained relationships with doctors, pharmacists, and hospital procurement teams across an assigned territory
- Consistently met and exceeded monthly and quarterly sales targets through market analysis and client relationship management
- Developed strong skills in stakeholder communication, data-driven decision making, and understanding customer needs — skills I now apply directly to product and technical work

Aristo Pharmaceuticals Pvt. Ltd.

1 year 11 months

Territory Business Executive

May 2019 - March 2021 (1 year 11 months)

Kerala, India

Territory Business Executive responsible for pharmaceutical sales across an assigned region in Kerala, India.

- Managed end-to-end sales cycle from prospecting to closing across a portfolio of pharmaceutical products
- Developed market insight and customer empathy that now directly informs my approach to product thinking and user-centred design

Territory Sales Executive

May 2019 - March 2021 (1 year 11 months)

Education

Cochin University of Science and Technology (CUSAT)

Bachelor of Technology - BTech, Electronics and communications · (June 2013 - June 2017)

College of Engineering, Perumon

Bachelor of Technology, Electrical, Electronics and Communications
